

PITCH COMPANIES

1) VETSON

VETSON is a veterinary telemedicine platform, specializing in helping rural and large animal veterinary practices reach their clients more efficiently through video consultations, direct to client shipping of medication. VETSON also helps practices maintain case records, manage medication and invoice while innovating how animal health information can get the veterinarian without travelling hours.

VETSON is supporting practices from the Yukon to PEI and now into the US, with over 450 farms connected. www.vetson.ai

2) CSTAINABLE INC.

Cstainable Inc. is a Canadian precision ag-tech & climate-tech company dedicated to optimizing the growth of greenhouse vegetable crops with our Cstainable™ Crop Enhancement technology. We enable greenhouse growers to increase yields, double profits, reduce CO2 emissions and make more money. www.cstainable.com

3) FARM HEALTH GUARDIAN

Farm Health Guardian is a biosecurity management technology (hardware and software) to help farms and food companies improve animal health and protect against the devastating impact of animal disease. The patented system controls barn entry using facial recognition technology and provides real-time alerts when people or trucks breach biosecurity protocols. www.farmhealthguardian.com

4) FLONERGIA SYSTEMS INC.

FloNergia Systems, an Ontario corporation spun off from the University of Guelph and based in Hamilton, Canada, provides innovative FloMov™ airlift pumps. The company has been selling its products since 2018, successfully penetrating key markets such as water/wastewater, aquaculture, and agriculture systems for water circulation and aeration. FloMov™ pumps reduce energy consumption by 50-70%, improve aeration efficiency by up to 40%, effectively strip CO2, and handle solid waste—all with no moving parts and minimal maintenance. www.flonergia.com

5) HAGGERTY AGROBOTICS

Haggerty AgRobotics is a leader in the emerging agriculture robotics and automation industry. For several years, Chuck Baresich, Founder and President, has been researching and testing various technologies on the Haggerty Creek farming operation. Haggerty AgRobotics is proud to offer a wide range of cutting-edge technologies that can help farmers increase efficiency, reduce operational costs, and improve crop yields. The farming operation is part of Haggerty Creek Ltd. owned & operated by Chuck & Justin Baresich and AGRIS Cooperative since 2001.
